

Butt Splice Crimp Tool

Model SA-CNTO-0001

| NAME | ORDER NUMBER |
|------------------------|--------------|
| Butt Splice Crimp Tool | SA-CNTO-0001 |

The Butt Splice Crimp Tool is designed with a wire cutter and long nosed stepped jaws for crimping CNI Butt Splice Connectors and similar industry standard butt splice connectors.

The PVC coated handles provide a smooth comfortable grip while cutting soft copper telephone and network wire as well as when crimping the butt splice connectors. The long nosed stepped jaws are designed to provide a parallel crimping action that provides the correct pressure and travel distance to ensure a properly terminated connection.

Note: Non soft copper telephone wire can damage the cutting blade
