The Butt Splice Crimp Tool is designed with a wire cutter and long nosed stepped jaws for crimping CNI Butt Splice Connectors and similar industry

The PVC coated handles provide a smooth comfortable grip while cutting

soft copper telephone and network wire as well as when crimping the butt

splice connectors. The long nosed stepped jaws are designed to provide a parallel crimping action that provides the correct pressure and travel

Note: Non soft copper telephone wire can damage the cutting blade

distance to ensure a properly terminated connection.
