

2112 Wire Wrap Terminal Block

Model MDF-2112

| NAME | ORDER NUMBER |
|--|---------------------|
| 192 Port 8x24 Plug Wire Wrap Terminal Block | SA-2112-P124 |

The Comtest MDF-2112 is a 192 Port Wire Wrap Terminal Block whose innovative design uses a PCB to connect the wire wrap block to the RJ-21 connectors. The solid PCB eliminates noise interferences associated with current internally wired terminal blocks.

The Wire Wrap Terminal Block mounts on the front of the horizontal frame to provide a cross-connect field to the Outside Plant vertical frame.

SPECIFICATIONS

| | |
|-------------------------------|--|
| DIMENSIONS (H X W X D) | 102.24 x 198.76 x 162.18 mm 4.025 x 7.825 x 6.385 " |
|-------------------------------|--|

| | |
|------------------------------|-------------------------------|
| OPERATING TEMPERATURE | -40 to 65 *C -40 to 149 *F |
|------------------------------|-------------------------------|

| | |
|---------------|--------------------|
| WEIGHT | 1.68 kg 3.7 lbs |
|---------------|--------------------|

| | |
|------------------|---|
| INTERFACE | Front - Wire Wrap pins Bottom - RJ21 |
|------------------|---|

| | |
|-----------------|-------------------------------|
| CAPACITY | 192 Subscriber loops per unit |
|-----------------|-------------------------------|

| | |
|-------------------|--------------------------|
| COMPLIANCE | ATIS-0600026.2010(R2015) |
|-------------------|--------------------------|

BENEFITS

- Superior performance - removes 200 pairs of wires inside housing
- Easy installation and jumper termination
- Fits standard Horizontal Distribution frame
- PCB eliminates noise interference and crosstalk
- First MDF frame block designed specifically to perform in the xDSL environment
